Ambient, Task & Accent  
Recessed Lighting

# Cultivate An Unforgettable Experience

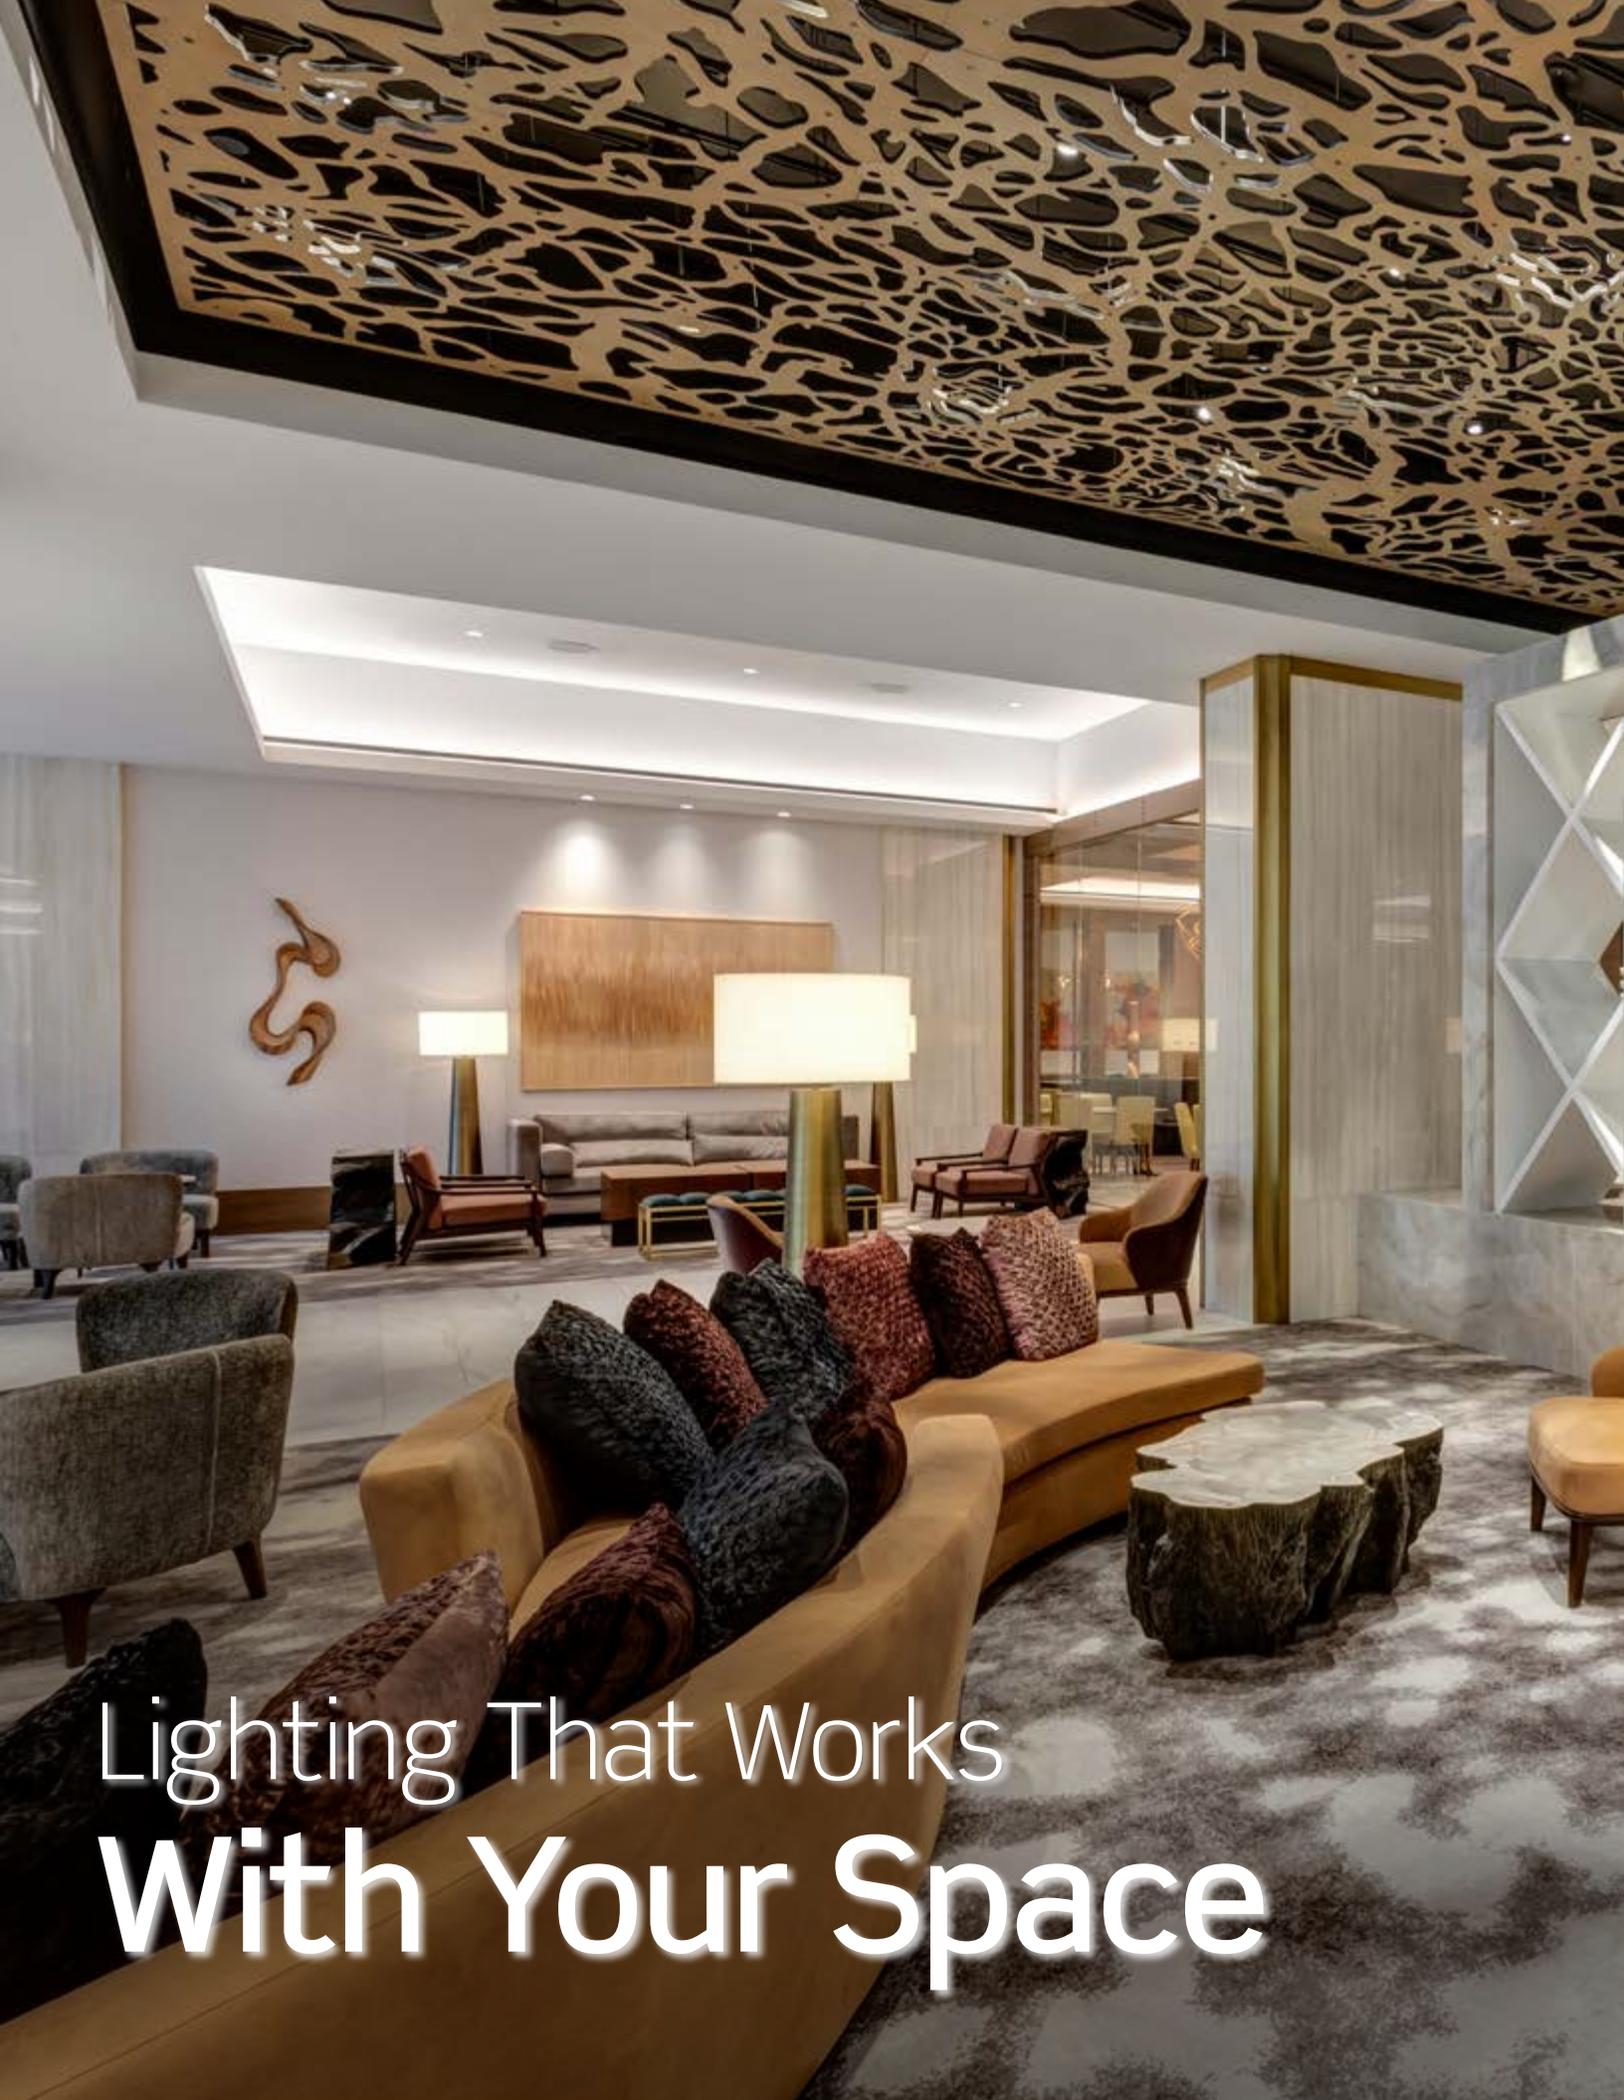

---

Humans interact with light before anything else. An inviting, well lit space sets the tone for the kind of experience someone will have. Hospitality revolves around designs that elicit a sense of comfort and home, all while serving countless purposes.

How do we ensure continuity across a project that varies from uniformly illuminated common spaces such as lobbies to bars and restaurant needed accent lights that create just the right mode? At Intense we develop families of luminaires with a wide range of configurability that help maintain continuity throughout an entire space.

Lighting That Works  
**With Your Space**

# Lighting That Makes An Impression

Complex applications require custom solutions. Large open spaces demand even, general illumination while architectural elements and textures typically require precise, high impact accent lighting.

## Architectural Versatility

Factors such as varying ceiling heights, transitional areas, and the need to fit the overall architecture are challenges that require luminaire flexibility.

An efficient lighting system should provide options such as a wide range of CCTs, multiple beam distribution, field-changeable accessories and architectural dimming options.

# Lay the **Groundwork** For **Cohesive Environments**

Wet Location

Full Range of CCT's

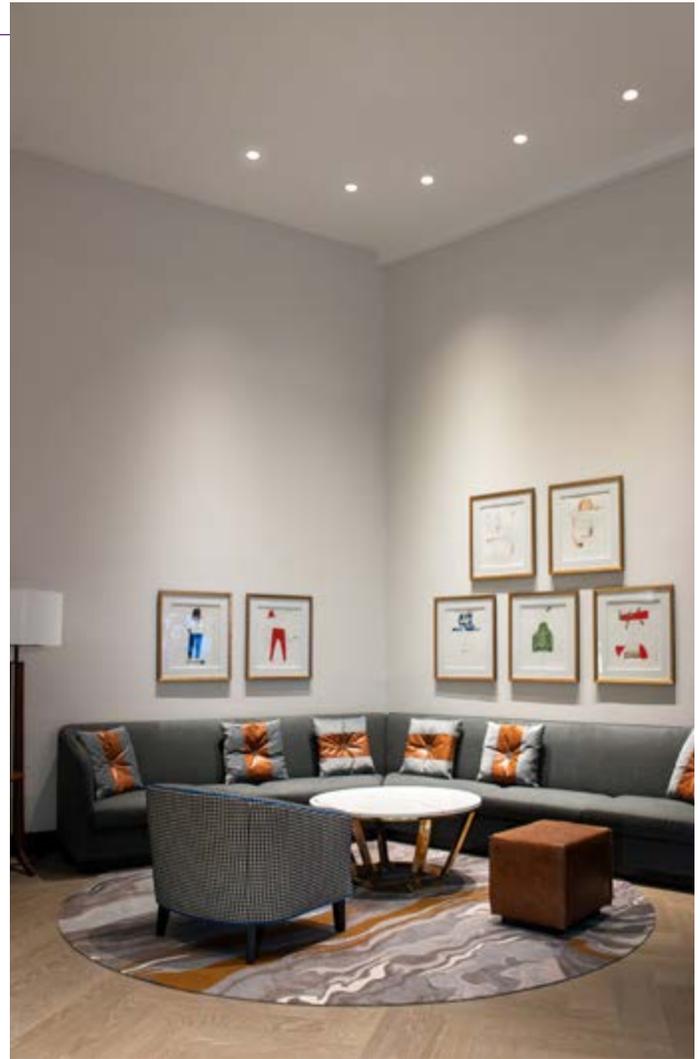

# Transformative & **Flexible Lighting**

Low Glare Deep Set LED

**Field-Changeable  
Optics and Accessories**

**Adjustable Accents**

Hospitality lighting should be designed to influence an alluring, inviting atmosphere. Specification grade solutions such as precision beam control, architectural deep dimming, and designer trims make choosing your lighting a cinch.

As needs change, your lighting needs to adapt. Expansive options all within one product family ensure seamless adjustments and uniform illumination.

# Take Control, Set The Mood

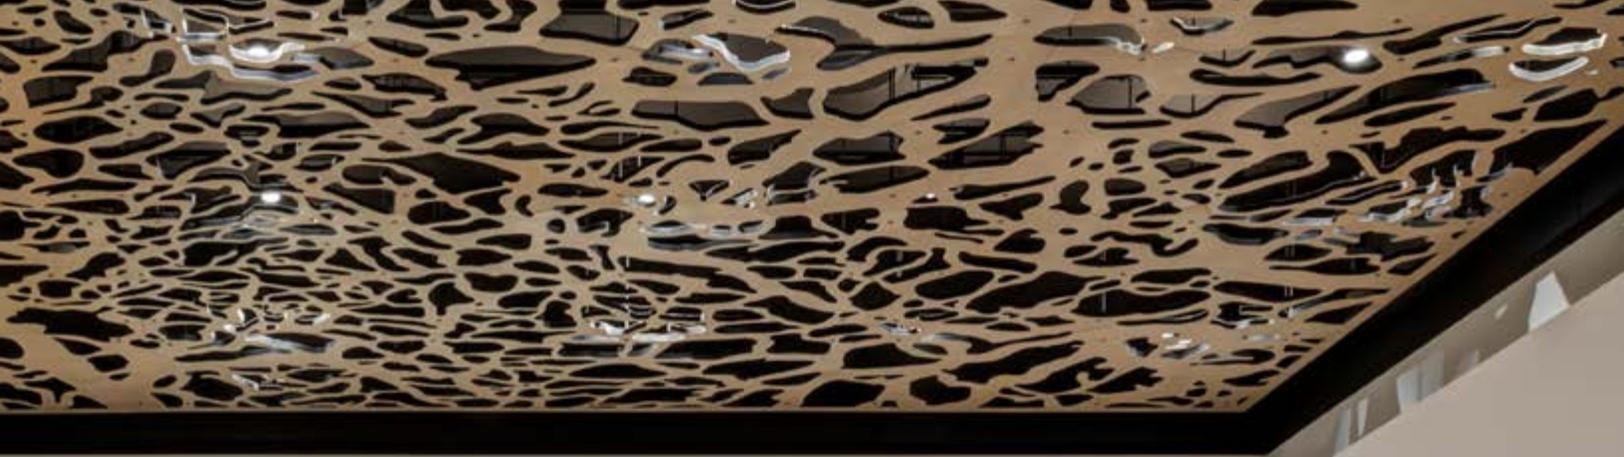

Dial in just the right mood with tunable white technology. The ability to preset the CCT of luminaires in a space throughout the day can help transform spaces by adjusting the lighting depending on how they are used throughout the day.

6500K  
to 2700K

**Tunable White**  
Dynamic White Illumination

# Wind Down, **Get Comfortable**

There's no denying the comfort we all feel from warm incandescent light sources. Providing an old school feel with new school performance, Warm Dim emulates the same warm glow with the flexibility of LEDs. Fill your space with beautiful, warm light that transforms the guest experience.

3000K  
to 1800K

Enhance Your Space

# Control at your Fingertips

Lighting and controls play an important part in a hospitality application. Enhance guest experiences for an unforgettable stay and improve space functionality while meeting energy code compliance.

Tailor lighting to promote a welcoming environment that builds brand loyalty and repeat business. From 0-10V to DMX512 our luminaires are compatible with all major control types.

0-10V, Lutron and DMX Options

Architectural Dimming Down to 0.1%

# The Perfect Downlight for Any Space

## MX 3.5-Inch Downlighting

### Extensive Housing Options

- Air-Tight IC
- Chicago Plenum
- Non-IC & Remodel Options
- Available in Cylinder, Track, and Recessed Multiples

Best for common use spaces such as lobbies, restaurants, and bars

### Title 24 and Energy Star Compliant

Extended Collar  
5/8 to 2 inches

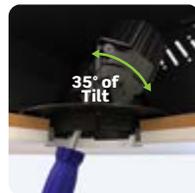

1-Inch Extended Collar

2-Inch Extended Collar

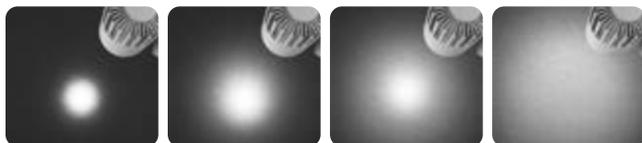

368° of Rotation

35° of Tilt

Horizontal Adjustment  
368° of Rotation

Vertical Adjustment  
35° of Tilt

12° Spot

21° Narrow Flood

36° Flood

50° Wide Flood

### Performance Optics

9°, 12°, 24°, 36° & 50°

## Color Reliability

- 2 SDCM Binning ensures color consistency across luminaires
- Available in 2700K, 3000K, 3500K & 4100K
- High CRI and modified spectrum CCT's (82 & 92)

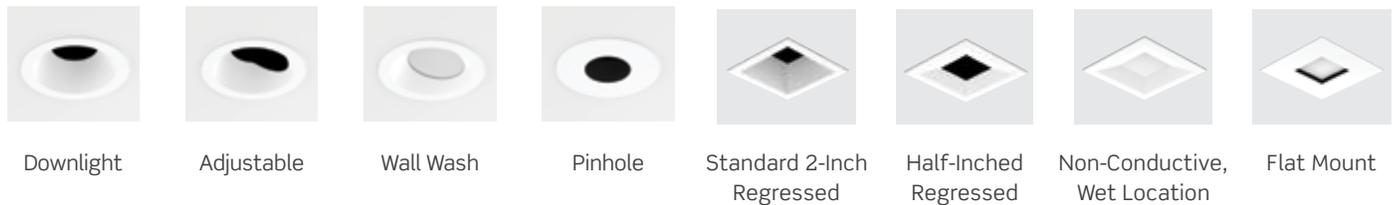

## Multiple Control Options

- Standard 0-10V 1% dimming, ELV, DALI and DMXR
- Tunable White: Selectable CCT's from warm to cool white
- Dynamic Dim: Warms along the black body curve
- Deep 0.1% dimming

## Trim, Trimless & Wood Ceiling in Multiple Applications

### Specification Grade Reflectors

# Solutions for Any Room

## Gravity Downlighting

- Up to 10,000 lumens
- Round or Square Aperture
- Downlight, Adjustable, Wall Wash, Remodel & Shallow
- Easy New Construction & Remodel (Non-IC) Installation
- Extensive Dimming Options
- Available in 2, 4, 6 or 8-Inch Apertures
- Available in Cylinder, Track, and Recessed Multiples

Best for high ceiling applications such as ball rooms and banquet rooms

Shallow Housing

4" Downlight Round or Square.  
Adjustable Collar Height  
(1/2" to 2-1/4")

4" Downlight  
Remodel

4" Adjustable Round or Square  
40° Tilt & 360° Horizontal  
Rotation

4" Wall Wash Round or Square.  
Asymmetrical Distribution for  
Even Wall Illumination

## Color Reliability

- 2 SDCM Binning ensures color consistency across luminaires
- Available in 2700K, 3000K, 3500K & 4100K
- High CRI and modified spectrum CCT's (82 & 92)

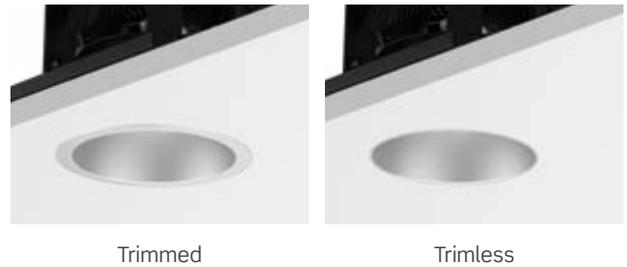

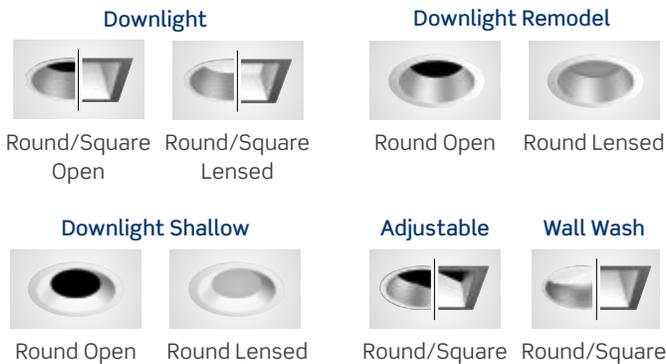

## Multiple Control Options

- Standard 0-10V 1% dimming , ELV, DALI and DMXR
- Tunable White: Selectable CCT's from warm to cool white
- Dynamic Dim: Warms along the black body curve
- Deep 0.1% dimming

## Trim & Trimless in Multiple Applications

### Specification Grade Reflectors

# Performance that's Affordable

## LC/LD 4-Inch

- Up to 1500 lumens
- Inherent airtight IC and CCEA rated for Chicago Plenum
- 2-Step MacAdam binning and 92 CRI Standard
- Suitable for damp location
- Single housing that accepts both square and round trims

Best for guest rooms and hallways
